About MedGlobal

MedGlobal is a humanitarian, charitable non-governmental organization (NGO) that provides emergency response and health programs to build resilience among vulnerable communities worldwide. Our health programs support victims of crisis and conflict, refugees, internally displaced persons, and marginalized communities in disaster-affected and low-resource settings.

MedGlobal was launched in 2017 by a diverse group of doctors, nurses, global health specialists, and humanitarians to address the health needs of the most vulnerable populations. MedGlobal partners with local communities to address their health priorities, build resilience through training and education, deploy healthcare volunteers, and donate medical equipment, medications, and supplies.

MedGlobal field teams support local health programs for vulnerable populations in North and Latin America, Africa, MENA, Europe, and Southeast Asia. Our growing field teams and partner organizations are supported by selfless volunteer nurses and medical professionals of all specialties from 27 countries who embrace our mission.

Mission

Our mission is to partner with communities suffering from disasters and/or limited resources to improve access to sustainable, dignified healthcare through emergency response, health services delivery, and building resilient health-care systems.

Vision

MedGlobal is dedicated to a world without disparities in health.

Core Values

Humanitarianism
Diversity
Cultural Competency
Volunteerism
Professionalism
Partnership & Collaboration

Dr. Zaher Sahloul

President, MedGlobal

Dear Donors, Partners, and Volunteers,

With immense gratitude, I introduce our 2022 report and thank you for your continuous support of MedGlobal's mission to provide healthcare services to the most vulnerable communities in the world.

In the past year, MedGlobal has significantly strengthened resilience in disaster regions, specifically Syria, Yemen, Bangladesh, Lebanon, Sudan, Gaza, Colombia, and Ukraine. We partnered with local communities, trained doctors, nurses, community health-care workers, and midwives, championed nutrition, health literacy, and vaccination campaigns, provided life-saving technology and equipment, and provided free medications and medical supplies to the communities deprived of healthcare.

Our doctors and nurses provided dignified healthcare to the refugees, displaced, and host communities. The impact was better health and improvements in health outcomes.

Our response to the war in Ukraine was early, courageous, and effective. MedGlobal was the first NGO that arrived in Ukraine after the Russian invasion. We worked with the Ministry of Health and local hospitals to increase their capacity, prepare their surgeons, nurses, and medical staff for the influx of trauma patients, and reduce the mental health consequences of war. We built strategic partnerships with local hospitals and many local organizations to amplify our impact.

None of these milestones would have been possible without your support. Your generosity has enabled us to continue our mission to provide quality healthcare to those most in need.

On behalf of the MedGlobal team, I extend my deepest thanks to our donors, partners, and medical volunteers, whose support has driven our success in the past year. Working alongside you toward our shared goals has been an honor and privilege.

2022 IMPACT

"We can and should do good for human beings. We can step forward to change systems of injustice."

The Russian war on Ukraine caused a major humanitarian crisis in the heart of Europe. Millions of Ukrainians were displaced, and 7 million became refugees. The healthcare system has been severely affected. Healthcare centers and civilian infrastructure were and are targeted by Russian attacks.

MedGlobal responded early by sending medical teams from the US to provide training on mass casualties, management of poly-trauma and war injuries, Point of Care Portable Ultrasound (POCUS), nursing care of the wounded, and hands-on training for Chemical, Biological, Radiological, Nuclear, and Explosive (CBRNE) attacks in close collaboration with the Ministry of Health. MedGlobal helped to strengthen the healthcare system through the following:

- **Deployed** multiple teams of US doctors and nurses to provide training and perform life-saving surgeries for the injured.
- **Trained** 1033 medical healthcare professionals in 108 hospitals and 15 medical universities, covering 16 Oblasts.

- **Distributed** \$6.4 million of medications and medical supplies among more than 150 health centers
- **Established** a local team, supply-chain process, and strategic partnership with Ukrainian American (Razom, UMANA) and many local organizations.
- **Advocated** for the welfare of the Ukrainian people and helped co-found the American Coalition for Ukraine.

Empowering Swift Diagnosis: The Butterfly Ultrasound's Vital Role in Oleksandr's Life-Saving Journey

“In these conditions we are looking for fast and efficient solutions. One of them is the butterfly ultrasound. In intensive care time saved in diagnosis is critical and life saving.”
Valentina Lisnych, Head of Anesthesiology, Mechnikov Hospital.

Oleksandr, a resilient 70-year-old from Dnipro, whose journey embodies the life-changing impact of timely medical intervention. Arriving at Mechnikov hospital on a ventilator, his ordeal began in the depths of Donbas, where military paramedics found him. Seeking refuge from missile attacks, Oleksandr spent a harrowing week in a cold, damp basement, devoid of sustenance, leading to a distressing double pneumonia.

Upon his arrival, Oleksandr's condition initially appeared stable, but within a mere five hours, he deteriorated, struggling for breath. Swiftly adhering to protocol, an X-ray was taken, yet concerns lingered about the time required for image development. In a moment of innovative decisiveness, the Butterfly ultrasound device was enlisted for additional evaluation. Amidst the challenges posed by an already overwhelmed intensive care department, resources stretched thin by an influx of patients from the Dnipro border, efficiency and speed were paramount.

In a matter of minutes, the Butterfly ultrasound revealed a pneumothorax, a life-threatening condition necessitating swift action.

Thanks to this innovative technology, Oleksandr's stabilization was efficiently achieved. With dedicated care and the invaluable tool provided by the Butterfly ultrasound, his recovery progressed. While Oleksandr has since left the hospital, his journey reverberates as a testament to the vital role of portable ultrasounds and MedGlobal's impactful Resiliency Medical Missions in Ukraine.

SYRIA

“MedGlobal primary care services, training in Critical Care Medicine and mental health is crucial to meet the needs of our community traumatized by 11 years of war, and plagued by overwhelming disasters.”

Syria remains a complex humanitarian crisis and protection emergency due to over a decade of ongoing hostilities, including widespread destruction of civilian infrastructure and the world's largest number of internally displaced people.

Through partnerships with the local health authorities, the World Health Organization, Turkish health authorities, and multiple local partners, MedGlobal provides vital across-border healthcare, nutrition, WASH, protection, and mental health services to northern Syria through the following:

- MedGlobal runs four Primary Healthcare Centers in Kan Safra in Idlib, Al-Bab, Tal Al Hajar, and Tal Abyad that provide comprehensive primary care, pediatrics, reproductive and maternal health, vaccination, malnutrition, and mental health support to the most vulnerable populations in Syria, especially the internally displaced persons (IDPs), women, children, the elderly, and Persons with Disability.

- In addition, MedGlobal runs mobile clinics, the only psychiatric hospital for patients with severe psychiatric problems, the only Drug Rehabilitation center in Azaz, Malnutrition Management Center, and the only leishmania (a disfiguring skin disease transmitted by insects) treatment center in the region.
- MedGlobal provided vital training in the Mental Health Gap Action Programme (mhGAP) to dozens of Primary Health doctors on diagnosing and treating psychiatric conditions.
- Our core of local Community Health Workers provides vital services to their communities, including health literacy, malnutrition, psychosocial support, and management of Non-Communicable diseases (NCD) and communicable disease and outbreaks, including Cholera and COVID-19.
- MedGlobal provided support and training in Critical Care services to Rahma Hospital in Darkush, where we also supported building a primary outpatient clinic to serve the population in northwest Idlib.

- In collaboration with the Syria Immunization Group (SIG), MedGlobal teams ran vaccination campaigns for the Measles outbreak, childhood immunizations, and COVID-19 vaccination.
- In North East Syria, MedGlobal supported multiple healthcare programs in partnership with IHR, including hospitals, outpatient, and WASH in Hajin/Deir Al Zour region, and a comprehensive COVID-19 Vaccination program for the whole region, including Raqqa, Deir Al Zor, Hasaka, and Qamishli.

Empowering Childhood: MedGlobal's Lifeline of Hope and Healing for Reham

*"Thank you MedGlobal for supporting my daughter Reham with free healthcare and giving her hope to enjoy her childhood."
Reham's Father.*

Reham suffers with chronic asthma, residing in a refugee camp alongside her father, who grapples with an incapacitating leg injury. Having asthma attacks at intervals of approximately two months, Reham's father diligently seeks medical intervention to address her condition. Reham has experienced episodes of asphyxiation on multiple occasions, necessitating her admission to the hospital for stabilization over several days. However, the scarcity of healthcare facilities within the vicinity constrains their access to timely treatment.

Reham's family can't afford healthcare but her father heard about MedGlobal's Kansafr health center, which changed Reham's life. Under the care of a MedGlobal physician, Reham's medical condition was evaluated, leading to the prescription of essential medications that mitigate the severity of her asthmatic episodes.

This intervention, though modest in nature, bore significant implications for Reham and her family. It underscores the tangible impact of accessible healthcare and the pivotal role played by MedGlobal in changing the lives of individuals facing adversity.

YEMEN

“ MedGlobal has been active in Yemen since 2017. It is one of our country’s top NGOs that is making a big difference in the lives of millions of Yemenis.”

After eight years of conflict in the fragile state of Yemen, the healthcare system is on the verge of collapsing. There are significant short-ages of doctors, nurses, skills, medical supplies, equipment, medications, and inop-erable facilities.

MedGlobal helped to strengthen the healthcare system through the following:

- Integrated Healthcare, Nutrition, WASH, and Food Security programs through Mo-
bile Clinics/teams impacted 138,000 pa-
tients in four governorates.
- Comprehensive healthcare services, in-
cluding medical consultations, reproduc-
tive health care, nutrition support, com-
munity mobilization, laboratory work, free
essential medications, follow-up care,
referrals for complex cases, vaccinations,
and health education.

- Reducing Maternal and Neonatal Mortality by building two Emergency Obstetric and Newborn Care sites, four Basic Emergency Obstetric and Newborn Care (BEmONC) health facilities providing emergency obstetric care in five health facilities, promoting healthy pregnancy practices through campaigns, distributing NeoWarm blankets, and conducting Maternal ultrasound training programs
- Donation of life-saving Medical equipment, fully-equipped operation rooms, furniture, medical supplies, fuel, cleaning materials, and WASH rehabilitation.
- Training of healthcare professionals in Point of Care Portable Ultrasound (POCUS), BEmONC, Integrated Management of Childhood Illness, community-based management of Acute Malnutrition, and infection prevention control.
- Distribution of 40 oxygen cylinders, medical equipment, and medications across five healthcare facilities and hospitals in response to the COVID-19 pandemic.
- Construction of 20 mobile latrines for IDPs in camps, impacting 121,500 Internally Displaced Persons.
- Impacting 398,894 patients who received health consultations, 70,115 children who received malnutrition services, 179,270 civilians who received health education and awareness, and 238,820 persons who benefited from WASH programs.
- State-of-the-art Point of Care Portable Ultrasound (POCUS) training program in partnership with Bridges to Health, including donations of multiple ultrasound devices, setting up training rooms, remote- training, training the trainer program, and competency certification.

A New Beginning, Suhaib's Journey from Despair to Triumph with MedGlobal

"My husband and I were so scared, our only child was dying before my eyes every day. There was nothing we could do to help him.

Thank you, MedGlobal, for saving Suhaib's life."

Suhaib's Mother.

"From the moment my son Suhaib was born, he has battled intestinal atrophy, a condition where the removal of a section of the intestines necessitates an alternate means of excretion through an abdominal incision. Our financial constraints made regular hospital visits for wound care and treatment in Mukha an unattainable luxury. This predicament led to Suhaib's severe acute malnutrition and complications from the abdominal wound.

MedGlobal's mobile medical team was a ray of hope for us. Dr. Jamil's skilled care encompassed wound treatment, dressings, and essential measurements. Suhaib's diagnosis of severe acute malnutrition prompted Dr. Jamil's prescription of antibiotics. MedGlobal's dedicated nutritionist equipped me with nutritional supplements and imparted knowledge about their use and the importance of personal hygiene.

I found out the MedGlobal mobile team is normally scheduled biweekly, but they went above and beyond, visiting us every two days to monitor Suhaib's critical condition. Their unwavering support ignited a transformation, gradually leading to his recovery. Today, I am humbled and grateful to witness my son's triumphant comeback from severe acute malnutrition, and we can never thank MedGlobal enough." - Suhaib's Mother

GAZA

“The MedGlobal team trained me on the use of portable ultrasound and donated a device to my hospital. I use POCUS everyday during my ICU rounds. It saved many lives.”

2.1 million Palestinians live under a longstanding Israeli blockade and frequent attacks and wars with limited access to primary, and specialized healthcare and medical treatment.

MedGlobal improved access to healthcare to the most vulnerable through:

- Emergency Response to the Israeli attacks by donations of medications, medical supplies, equipment, to the five main hospitals that receive injured patients especially Al Shifa hospital in Gaza city that impacted 20,000 patients.

- Mobile clinics to improve Elderly Health and access to healthcare among this group, often ignored by current healthcare programs, through training caregivers on psychosocial support, providing medications and medical supplies, wound care, regular check-up, home monitoring, health care education, and donation of medical assistance devices.
- Training Emergency Department and Critical Care doctors on management of trauma and critically ill patients using Point of Care Portable Ultrasound (POCUS), and donation of ultrasound devices in six hospitals.
- Improving early diagnosis of Breast Cancer through a health literacy program that targeted 4,850 women, and routine mammograms.
- Reducing Malnutrition among children below age of five through educating mothers and caregivers on breast-feeding, screening for malnutrition, and providing nutritional supplements to children with Moderate Acute Malnutrition (MAM), and Severe Acute Malnutrition (SAM)
- Sending periodic Medical Missions to build Resiliency, provide training, perform surgeries, and provide advocacy on behalf of the Palestinian population

LEBANON

“

“Home healthcare and mobile clinics supported by MedGlobal in Beirut and Beka is a groundbreaking initiative to improve access to healthcare among both refugee and host communities. With this initiative, they have provided prompt diagnosis and treatment to the most vulnerable; especially the elderly, disabled, and patients with mental health trauma, and Non-Communicable Disease”

Lebanon, afflicted by an economic crisis, is home to 2.1 million Syrian and 300,000 Palestinian refugees. Eighty-eight percent of refugees struggle to survive in poverty. Since 2019, the nation has been experiencing a severe economic crisis, hyperinflation, and the near collapse of the banking system.

In partnership with the Church of Latter Day Saints, MedGlobal championed several niche medical interventions to improve access to healthcare among the refugee and host communities through:

- **Mobile Clinics** that provided essential primary healthcare, education, home health, mental health support, and free medications, labs, and radiology testing to the most vulnerable in the community, especially the elderly that completed 900 consultations, 2,709 lab, and radiology services to 1,447 patients.
- Increasing the capacity of **Primary Healthcare Centers** including by donation of 2,737 medical equipment, and 6,000 medication kits in coordination with the Ministry of Health and the World Health Organization.
- **Winterization programs** that delivered essential fuel to health facilities to maintain operations during the current electricity, economic, and pandemic crisis.
- **Refugee Camp relief** in Aarsal camp by providing 300 refugee families with nutritional support, medications, medical supplies, and heating fuel.
- **Mental Health Support** via state of the art innovative Mental Health Mobile Clinic to increase access to mental health services and information through awareness and outreach sessions, and psychiatric consultations.

SUDAN

“

“MedGlobal partnered with local Sudanese organizations to renovate a tertiary hospital in Khartoum, provide healthcare programs to the refugees in eastern Sudan, and provide flood relief. Thank you MedGlobal.”

In late 2021 Sudan was steps away from political stability and ultimate economic recovery, but a historical coup took place and set Sudan back again. After the uprising, most international development assistance was paused, and debt relief was suspended. Sudan became a fragile state in the heart of Africa. It continues to host millions of refugees from bordering African countries that have their own wars and crises.

In partnership with the Church of Latter Day Saints and Stirling Foundation, MedGlobal supported multiple healthcare programs in collaboration with local organizations through the following:

- Strengthening the Healthcare System in the capital, Khartoum, by working with the Ministry of Health to improve the infrastructure of the major hospitals like the renovation and equipping of Jafar Ibn Auf hospital, the largest pediatric specialty referral hospital in Sudan, which impacted the health services to 29,000 children.
- Refugee Health Care Program in partnership with United Nations Refugee Agency (UNHCR), in Gedaref State, at the Tunaydbah and Um Rakuba refugee camps that serve 40,000 Ethiopian refugees from the Tigray region, by supporting and training 13 healthcare professionals, providing free medications and medical supplies, PPE, infection control measures, COVID-19 prevention, laboratory equipment, and installing a solar system, laboratory equipment, and medications.
- Training of 50 healthcare professionals to provide home healthcare 500 home visits per month for families in the host community.
- Flood Relief in Al Fao by providing a mobile clinic, clean water, and free medications, for a large camp for the Internally Displaced Persons (IDP).

BANGLADESH

“I would like to express my profound and sincere gratitude for the incredible work that MedGlobal has done since 2017. MedGlobal’s contributions were crucial to the overall humanitarian response, coordination, healthcare service delivery, and partnership established by the Government of Bangladesh.”

Flood Relief

The Rohingya refugee crisis triggered by the genocide committed by the Myanmar military and local militias led to the exodus of one million refugees to the Cox's Bazar region in Bangladesh. Over 700,000 Rohingya refugees reside in densely populated camps, facing additional challenges like cyclones, floods, and fires that have destroyed thousands of tents and shelters, leading to further displacement. There are an estimated 174 maternal deaths per 100,000.

MedGlobal's local team of doctors, nurses, mental health, and community workers runs multiple clinics, birth centers, and training programs catered to the refugee and host community to improve access to healthcare and improve healthcare benchmarks through:

- Reducing Maternal and Neonatal Mortality in collaboration with the WHO, by training 123 healthcare professionals Helping Babies Breathe, maternal and child health services, POCUS, Basic Lifesaving in Obstetrics, Essential Newborn Care (ENC Now!), and health communication, equipping three primary healthcare centers with ultrasound machines for early detection of high-risk pregnancies.

- Refugee Healthcare Clinics that provided conducting 51,569 health consultations, and provided community health awareness to 25,177 refugees.
- Supporting the Joint Response Plan of COVID-19 and Diphtheria Vaccinations for 19,806 people.
- Flood Relief by deploying a Mobile Clinic to provide a multitude of health services, antibiotics, diarrhea kits and hydration solutions, medications, and reproductive health care to 26,110 flood-affected people in addition to nutrition, and WASH services.
- Distributing 560 Solar Panels to Rohingya refugees and host community members in Cox's Bazar
- Mental Health Support, counseling, and medications to 914 patients with psychiatric disorders.

A Tale of Hope at MedGlobal's Maternity and Birth Center

"Fatima was mute at birth. She has been my housekeeper ever since her husband left. Her family can't feed her and the baby. So I decided to come to MedGlobal's Maternity and Birth Center for help as I heard you serve the people of Somitipara for free."

Sabina, a friend of Fatema.

At the MedGlobal Maternity and Birth Center (MBC), Rabeya (midwife) and Tapura (assistant) work hard to serve the women of Somitipara, as the only care option for many in this community, they are a lifeline for this displaced community.

Sabina sought assistance for her friend Fatema, who was in labor, early one morning. Rabeya and Tapura sprang into action. Rabeya quickly gathered Fatema's pregnancy and general health history before examining her abdomen. Rabeya and Tapura attempted to listen to the baby's heartbeat using a Doppler and a continuous monitor, while Rabeya questioned Fatema about the strength and frequency of her contractions. However, they began to realize that they were facing a unique challenge when Fatema did not respond to Rabeya's questions. Fatema was screaming and crying but the staff was unable to interpret her attempts at communication. If a patient cannot follow instructions, the birthing process may be more dangerous for the mother and child. Using creative thinking, Rabeya and Tapura enlisted Sabina to bridge the communication gap. Dr. Farhana and our medical professionals worked together to ensure a safe delivery.

The team's unified efforts prevailed, guiding Fatema through intense pain. Fatema's beautiful daughter was born at 1:40 p.m. As Rabeya placed the infant in Fatema's arms, Fatema was beaming with happiness.

COLOMBIA AND VENEZUELA

“As immigrants without health insurance, we are grateful. MedGlobal is crucial for Venezuelan migrants in Cucuta, Colombia, because they help us, give us medical advice, and help Colombians and Venezuelans in need. We appreciate MedGlobal’s help.”

Zulima Urdaneta, 58, Migrant from Venezuela

“Some people say the Venezuelan crisis is over and that our work in Colombia is no longer needed. Tell that to my patient’s mother, an RN who runs an ICU in Venezuela, earning \$35 a month, and cannot feed her family. The crisis remains very real to these people... our work remains as important as ever.”

The crisis in Venezuela has been ongoing since 2015, leading to 7 million refugees leaving the country. Colombia hosts 2 million of these refugees, with the number continuing to increase, and the COVID-19 pandemic exacerbated the regional economic challenges.

MedGlobal improved access to healthcare to the most vulnerable through:

- Providing medical aid to refugees moving south to Ecuador and Brazil at Los Patios Sanitary and Health Center with primary care, COVID-19 testing and isolation with a total of 3,637 medical consultations.
- Providing maternal healthcare by distributing 400 hygiene kits to mothers, and 400 newborns at the Meoz public hospital in Cucuta who delivered via Cesarean section and providing 1,543 prenatal care consultations. 200 food vouchers were provided to families with premature babies and other vulnerable cases.
- Reopening a first contact care clinic, 'Casa Venezuela', in the La Parada neighborhood, providing 3,530 medical care consultations and diagnostic ultrasounds and a soup kitchen that served 2,226 meals.
- Providing 4,874 medical consultations to refugees, especially pregnant women and those with NCD in San Antonio, Tachira, Venezuela and a school deworming project for 700 children in Tachira.
- Community outreach activities providing 81 medical consultations in the San Faustino neighborhood, serving vulnerable Colombians and Venezuelan migrants and refugees.
- Conducting three resiliency medical missions (RMM) with international medical volunteers in the neighborhood of El Talento, Cucuta, and established an ongoing health-care presence in the neighborhood serving 2,500 medical consultations. Primary care services were provided with a team of one family doctor and two community health workers.

ECUADOR

“MedGlobal arrived in Ecuador at one of its most critical times due to the country’s political and social problems, which have a direct impact on the country’s primary services...The Migrant Care Center in Guayaquil, Ecuador, provides humanitarian aid...to the vulnerable Venezuelan migrant population that lacks access to public health systems or private care due to the high cost. The care center affords them the opportunity to improve their quality of life by addressing one of the most important axes for families.”

Mariuxi Safadi, MedGlobal Project Coordinator, Ecuador

At-A-Glance

Conducted needs assessment in Guayaquil and Santa Elena Province

Established a primary care clinic in Guayaquil

Almost 500,000 Venezuelan immigrants and refugees currently reside in Ecuador, which has become an important destination and transit country for these individuals. The on-going pandemic has increased the importance of providing immediate medical and social support to vulnerable communities in Ecuador, particularly in Guayaquil and rural areas.

MedGlobal responded to the urgent needs of vulnerable communities in Guayaquil during the pandemic by:

- MedGlobal visited different health facilities in the area and learned about the limitations to health services that Venezuelan migrants and refugees faced. In addition MedGlobal visited Santa Elena Province meeting with the local Mayor and local health authorities to learn more about the health needs of the community.
- MedGlobal established its presence in Guayaquil in the Atarazana neighborhood to serve Venezuelan migrants and refugees in the area offering primary and nutritional care services.
- The clinic was furnished with new medical equipment, medications and supplies were procured and a team of a general physician, nutritionist, nurse and receptionist were hired.
- A local electronic medical record was implemented by providing training to all medical staff.
- The clinic, Centro de Atencion al Migrante (Migrant Service Center) was ready to start services in January 2023

HAITI

Haiti experienced a 7.2 earthquake on August 14, 2021. In the earthquake, 1,300 people died and thousands were injured and displaced. In the following month, 650,000 needed humanitarian aid. At least 700 homes, health facilities, schools, and vital infrastructure were destroyed, leaving tens of thousands without food, shelter, or emergency medical care, worsening Haiti's health infrastructure.

MedGlobal responded to the urgent needs of vulnerable communities in Guayaquil during the pandemic by:

- Distributed essential medical supplies, medications, and equipment to frontline health-care workers in vulnerable communities across Jérémie. Personal protective equipment, orthopedic supplies, emergency essentials, stretchers, life-saving medications, and even electrocardiogram equipment were provided, ensuring that healthcare professionals could continue their life-saving work amidst challenging conditions.
- MedGlobal worked throughout 2022 to rehabilitate the Centre de Santé de Latibolière hospital, which the earthquake in Jérémie had severely damaged. The hospital was completely rebuilt to ensure that the community had access to vital healthcare once again.

MEXICO

“It was a privilege to volunteer for MedGlobal at the Texas/ Mexican border in both Matamoros and Reynosa. To see the hope on the faces of the young mothers who had come all the way from Venezuela was both heartwarming and depressing at the same time. They had come this far and still weren’t certain of getting across the international bridge.”

The majority of Latin American migrants seek to enter the United States through the southern border. At the Mexico/Texas border in the state of Tamaulipas, there are two major border crossings: Reynosa, Mexico, across from McAllen, TX, and Matamoros, Mexico, across from Brownsville, TX, which both see thousands of migrants each year pass through and often stay for long periods of time.

MedGlobal responded to the urgent needs of vulnerable communities in Guayaquil during the pandemic by:

- Supplied clinics with vital medical supplies and essential medications in both locations. This concerted effort aimed to bridge gaps and ensure that those in need received appropriate care and treatment, particularly in challenging times.
- Deployed a Resiliency medical Missions RMM to work alongside local physicians. Volunteers from MedGlobal provided crucial assistance, contributing to the efforts of local physicians to improve healthcare delivery and provide the best possible care to the community.
- Invested in enhancing the capabilities of local physicians by providing a training program focusing on Point-of-Care Ultrasound, empowering healthcare practitioners with advanced skills. This initiative not only elevated the standard of care but also ensured that the medical community was equipped to address complex medical challenges effectively.

In 2023, MedGlobal intends to expand care at the southern border and care for migrants.

MEDGLOBAL RESILIENCY MEDICAL MISSIONS (RMMs)

In order to strengthen the resiliency of healthcare system in disaster regions, countries with large numbers of refugees, fragile states, and low income countries, MedGlobal recruits medical volunteers from diverse backgrounds and skill sets to participate in its global medical programs based on the needs and priorities of the local communities, based on needs-assessments, and in coordination with local healthcare authorities. Our team provides vetting and orientation, logistical support, connections, partnerships, security, and partial funding.

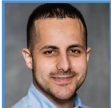

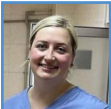

Doctors and nurses participating in medical missions provide training to their colleagues, perform procedures and surgeries, deliver healthcare services to the refugees and displaced, donate medical supplies and equipment, learn from the resilience of local healthcare professionals working in the midst of disasters, stand in solidarity with their colleagues, and bring their experiences, and voices to their local communities upon returning.

MedGlobal volunteers are encouraged to use social media, collect funds, write opinion editorials to their local media, publish their findings in medical journals, and present original research in medical and global health conferences to raise awareness and impact policies.

So far we have recruited more than 500 doctors and nurses from 25 different countries.

This year we sent 48 medical volunteers, medical missions to 3 countries that impacted 3,482 people and trained 1,701 healthcare professionals.

Followed are the names and specialties of our amazing 2022 volunteers:

	Ahmed Ebied, MD Anesthesiology		Susanne Burrato, MD Child Psychiatry		Jason Begue, MD Emergency Medicine
	Adam Beckett, MD Emergency Medicine		Thaer Ahmed, MD Emergency Medicine		John Peter McBride, MD Emergency Medicine
	Tanya Bucierka, MD Emergency Medicine		Rosena Allin-Khan, MD Emergency Medicine & Member of Parliament UK		David Hoovestol, MD Family Medicine
	Allison Walton, MD Family Medicine		Beverly Tembe, MD Family Medicine		Peter Houck, MD Family Medicine
	Rachel Mason, MD General Medicine		Kathleen Gallagher, MD General Surgery		John Scherk, MD General Surgery
	Conrad Fischer, MD Infectious Disease		Nabiha Islam, MD Internal Medicine		Riley Jones, MD Internal Medicine

ANNUAL CONFERENCE AND GALA

The theme of MedGlobal's annual conference held on November 18-19 in Chicago was "Conflict, Covid-19, Climate Change, and Health". It attracted a broad spectrum of more than 450 thought leaders, MedGlobal volunteers, global health experts, medical professionals, humanitarians, philanthropists, and the general public. Panels addressed major topics in global health, disaster health, refugee health, and the impact of COVID-19 on health locally and globally. MedGlobal Annual Humanitarian Awards were granted to accomplished and inspiring humanitarians. The conference was culminated by a powerful keynote speech by Dr. Omar Lateef, the CEO of Rush University System of Health, on "How to Improve Health Inequities Locally and Globally."

2022 Awardees

MedGlobal Humanitarian Awards

Dr. Mohammad Abbas
 Dr. Denisse Pareja Valarezo
 Dr. John Kahler
 Dr. Nahreen Ahmed
 Dr. Thaer Ahmed
 Dr. Rochelle Sweis
 Dr. Kathleen Gallagher
 Dr. Tanya Bucierka and Ukrainian American partners
 Alicia Bean
 Kristen Pizzuti
 Jan Kline

MedGlobal Philanthropy Awards

Elder Alvin S. Meredith III & Boyce Fitzgerald, Latter-day Saint Charities
 Peter Kovler, The Judy and Peter Blum Kovler Foundation

MedGlobal Lifetime Achievement Awards

Professor Len Rubenstein, Founder & President of Safeguarding Healthcare

Dr. Jacque Bérès, Co-Founder Doctors Without Borders

MedGlobal Humanitarian Awards

Dr. Sachita Shah, Director of Global Health, Butterfly Network

Professor Conrad Fischer, Director of Brookdale Medical Center, Global Educator

ADVOCACY AND MEDIA

“

“The cost of using your voice is low. The cost of not speaking out is great. It’s really important to engage in advocacy as MedGlobal does. And that’s why I’m proud to be associated with MedGlobal.”

Len Rubenstein, MedGlobal Board Member

”

Using different platforms, we advocate on behalf of the populations we serve in disaster regions to improve access to healthcare to the refugees and the most vulnerable, protect healthcare workers in conflict zones, respect International Humanitarian Law, increase humanitarian aid, localize and de-colonize aid, and advance accountability to local communities.

Coalitions

MedGlobal engages with the humanitarian and global health communities, the US government, USAID, US Congress, the United Nations, international NGOs, and multilateral institutions through our membership in local health clusters and active membership in multiple global and US-based coalitions, including but not limited to:

- [Interaction](#), the largest coalition of US-based NGOs working to eliminate extreme poverty, strengthen human rights and citizen participation, safeguard a sustainable planet, promote peace, and ensure dignity for all people.
 - [Safeguarding Health in Conflict Coalition](#), a global coalition of NGOs that advocate for protection of healthcare workers in areas of conflicts and wars. MedGlobal is a member of the Steering Committee.
 - [Every Breath Counts](#), a global coalition of NGOs, companies, funders, and governments and the world's first public-private partnership to support national governments to reduce COVID-19 and pneumonia deaths by supporting critical health infrastructures like oxygen generators, concentrators, ventilators, pulse oximeters, training, and education.
 - [American Relief Coalition for Syria](#), a coalition of US-based humanitarian organizations that provide humanitarian aid to the people of Syria.
 - [American Coalition for Ukraine](#) believes in democracy, freedom, human rights, and dignity for all people, and in particular for Ukrainians who are giving their lives in defense of these principles.
